

Milestone Project

Learning by building a project
is great way of learning

The screenshot shows a website template with a dark background featuring a large, scenic image of a lake and mountains. In the top left corner, there's a logo consisting of a grid of dots next to the word "Aria". The top right corner contains a navigation menu with links: HOME, INTRO, SERVICES, CALL ME, PROJECTS, ABOUT, CONTACT, and social media icons for Facebook and Twitter. The main content area has a white background. It features a large, bold heading "BUSINESS TEMPLATE" centered above a smaller text block that reads: "Aria is a top consultancy company specializing in business growth using online marketing and conversion optimization tactics". Below this text is a teal-colored button with the word "DISCOVER" in white capital letters.

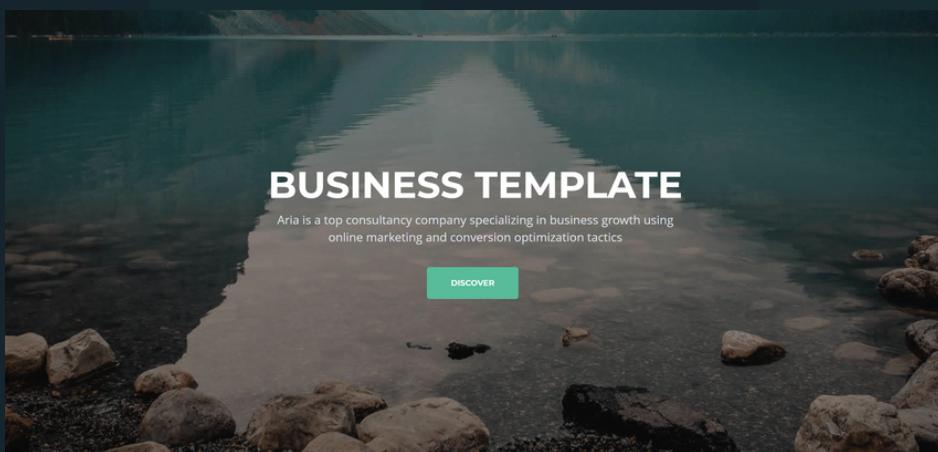

Step 1: Create a navbar using flex property

Step 2: Set the container's background-image property to the URL of your image.

- Style the image to ensure it's responsive. Use max-width: 100% to prevent image overflow.
- Style the text container to position it over the image. You can use position: absolute and adjust top, left, right, or bottom properties.
- Style the button for appearance and responsiveness. Use appropriate padding and colors.
- Use media queries to adjust styles based on different screen sizes.

Step 3: create this offer section and card section using flex property. and give flex-wrap to cards and make them responsive.

INTRO

We Offer Some Of The Best Business Growth Services In Town

Launching a new company or developing the market position of an existing one can be quite an overwhelming process at times.

"Our mission here at Aira is to get you through those tough moments relying on our team's expertise in starting and growing companies."

Louise Donovan - CEO

Environment Analysis

The starting point of any success story is knowing your current position in the business environment

Development Planning

After completing the environmental analysis the next stage is to design and plan your development strategy

Execution & Evaluation

In this phase you will focus on executing the actions plan and evaluating the results after each marketing campaign

Step 3: create following card using flex property and give media query in the CSS adjusts the card width for screens with a maximum width of 768px. You can modify the breakpoint and the card dimensions to suit your design and responsiveness needs.

[DETAILS](#)

1. The HTML structure places the image and text inside a flex container called `content` within a main container `container`.
2. The CSS styles create a responsive layout where the image takes up a maximum of 50% of the container width and the text takes up the remaining space using flex properties.
3. The @media query ensures that when the screen width is 768px or less, the layout changes to a single column for better mobile responsiveness.

Accelerate Business Growth To Improve Revenue Numbers

1 How Can Aria Help Your Business

At Aria solutions, we've taken the consultancy concept one step further by offering a full service management organization with expertise.

2 Great Strategic Business Planning

3 Online Marketing Campaigns

1. The HTML structure places the image and text inside a flex container called content within a main container container.
2. The CSS styles create a responsive layout where the image takes up a maximum of 50% of the container width and the text takes up the remaining space using flex properties.
3. create a horizontal "charging" box with a green color, and a text button using HTML and CSS in it.
4. The @media query ensures that when the screen width is 768px or less, the layout changes to a single column for better mobile responsiveness.

The image shows a portion of a website's sidebar. On the left, there is a white sidebar with a dark green header containing three small icons followed by the words "Business", "Expertise", and "Quality". Below this, under the heading "Business Services For Companies", there is a paragraph of text. At the bottom of the sidebar, there are three horizontal progress bars with text labels above them: "Business Development 100%", "Opportunity Spotting 76%", and "Online Marketing 90%". To the right of the sidebar, there is a large, dark green-toned photograph of a dense forest of tall evergreen trees.

Business Services For Companies

Aria provides the most innovative and customized business services in the industry. Our [Services](#) section shows how flexible we are for all types of budgets.

Business Development 100%

Opportunity Spotting 76%

Online Marketing 90%

Step 5: Create these cards using flex property and give media query for responsiveness.

Read Our Customer Testimonials

Our clients are our partners and we can not imagine a better future for our company without helping them reach their objectives

I purchased the Growth Accelerator service pack a few years ago and I renewed the contract each year.

Marsha Singer - Marketer

Aria's CEO personally attends client meetings and gives his feedback on business growth strategies.

Roy Smith - Developer

At the beginning I thought the prices are a little high for what they offer but they over deliver each and every time.

Ronald Spice - Owner

Step 6 : Create forms

- **Container:** Use Flexbox or Grid for a parent container with two columns (50% each).
- **Text Section:** Place content in the first column with headings, paragraphs, and styling.
- **Contact Form:** Add form fields in the second column for name, email, etc.
- **Responsiveness:** Apply media queries for mobile-first design, adjusting layout and styling for different screen sizes.

CALL ME

Have Us Contact You By Filling And Submitting The Form

Step 6 : Create gallary section

- **Container:** Use a flex container with `display: flex;` and `flex-wrap: wrap;`.
- **Images:** Insert `img` elements inside the container.
- **CSS:** Apply `margin: 0;` `padding: 0;` to both the container and images.
- **Sizing:** Optionally, set fixed width and height for images.
- **Responsiveness:** Use media queries for different screen sizes; consider `object-fit` for image scaling.

Step 6 : Create footer section

- **HTML:** Use a **footer element** for the footer section and add content.
- **CSS:** Style the footer with width, padding, background color, and text alignment.
- **Positioning:** Employ flexbox or grid for content alignment within the footer.
- **Link Style:** Apply CSS to style links, including color and text decoration.
- **Responsiveness:** Use media queries for layout adjustments on different screens.

Few Words About Aria

We're passionate about delivering the best business growth services for companies just starting out as startups or industry players that have established their market position a long time ago.
